BioSystems, Volume 30 (1993)

Computer Genetics — Special Issue On Computational Molecular Biology

Foreword vii

Computation of biopolymers: A general approach to different problems
A.V. Finkelstein and M.A. Roytberg (Pushchino, Russia) 1

Quaternion representation of RNA sequences and tertiary structures
Y. Magarshak (New York, NY) 21

The theoretical analysis of the process of RNA molecule self-assembly
A. Kister, Y. Magarshak and J. Malinsky (Boston, MA and New York, NY) 31

A kinetic model of RNA folding
A.A. Mironov and V.F. Lebedev (Moscow, Russia) 49

Construction of the full local similarity map for two biopolymers
A.M. Leontovich, L.I. Brodsky and A.E. Gorbalenya (Moscow, Russia) 57

A novel method of multiple alignment of biopolymer sequences
L.I. Brodsky, A.L. Drachev, A.M. Leontovich and S.I. Feranchuk (Moscow, Russia) 65

Non-similarity combinatorial problems
A.R. Rubinov and V.G. Timkovksy (Moscow, Russia) 81

Quick assessment of similarity of two sequences by comparison of their *L*-tuple frequencies
A.A. Zharkikh and A.Y. Rzhetsky (Novosibirsk, Russia) 93

Statistical analysis of *L*-tuple frequencies in eubacteria and organelles
T.L. Sitnikova and A.A. Zharkikh (Novosibirsk, Russia) 113

Fractal graphical representation and analysis of DNA and protein sequencies
V.V. Solovyev (Novosibirsk, Russia) 137

Recognition of genes in DNA sequence with ambiguities
M. Borodovsky and J. McIninch (Atlanta, GA and Moscow, Russia) 161

Prediction of the non-exon-intron structure by a dynamic programming approach
M.S. Gelfand and M.A. Roytberg (Pushchino, Russia) 173

The Lempel-Ziv complexity and local structure analysis of genomes
V.D. Gusev, Va. Kulichkov and O.M. Chipakhina (Novosibirsk, Russia) 183

Global complexity analysis of genomes
V.D. Gusev, V.A. Kulichkov and O.M. Chupakhina (Novosibirsk, Russia) 201

Sequencing of pools of nucleic acids on oligonucleotide arrays
A.B. Chetverin and F.R. Kramer (New York, NY) 215

Efficient pattern comparative method for selecting functionally important motifs in protein sequences: Application to zinc enzymes
A. Kister, I. Muchnik, D. Bouzida, E.L. Reinherz and T. Smith (Boston, MA) 233

Computer-assisted dissection of rolling circle DNA replication
E.V. Koonin and T.V. Ilyina (Moscow, Russia and Bethesda, MA) 241

Genome sequencing: A glimpse of the area at the brink of the virus era
E.V. Koonin (Bethesda, MD) 269

Genetic language: metaphore or analogy?
M.S. Gelfand (Pushchino, Russia) 277
